Foil Mount Set

Care your stainless nuts for long life...

- Use only in combination with stainless bolts!
- Wash with fresh water, if dirty!
- Don't overtighten the screws:
 - > Overtightening can damage your board!
 - > Overtightening can cause seizing!
- If you won't disassemble your gear for a longer time (several days):
 - > Use some anti-seize compound between nuts and bolts!
 - > Check frequently, if all screws are tightened!

Have fun!
